

Appendix table for: Empowering women
through targeting information or role models:
Evidence from an experiment in agricultural
extension in Uganda

Els Lecoutere, David J Spielman and Bjorn Van Campenhout

December 16, 2020

Table A.1: Knowledge

	mean in ctrl	sd	traget women	se	target couple	se	t-test	nobs
				<i>Knowledge index</i>				
female outcome	-0.078	(0.605)	0.131 **	(0.048)	0.106 *	(0.050)	0.608	2753
male outcome	0.081	(0.607)	-0.154 **	(0.048)	-0.090 +	(0.049)	0.207	2647
joint outcome	0.002	(0.693)	-0.036	(0.053)	0.009	(0.054)	0.405	3042
				<i>Knowledge about proper spacing and seeds per hill</i>				
female outcome	0.126	(0.332)	0.067 *	(0.030)	0.049	(0.032)	0.564	2753
male outcome	0.263	(0.440)	-0.118 **	(0.032)	-0.025	(0.033)	0.006 **	2647
joint outcome	0.055	(0.228)	-0.017	(0.017)	0.017	(0.018)	0.056 +	3042
				<i>Knowledge combining practices and starting small</i>				
female outcome	0.818	(0.386)	0.055 +	(0.029)	0.048	(0.030)	0.799	2753
male outcome	0.892	(0.311)	-0.089 **	(0.028)	-0.038	(0.028)	0.082 +	2647
joint outcome	0.577	(0.494)	-0.026	(0.038)	-0.009	(0.039)	0.661	3042
				<i>Knowledge about optimal weeding</i>				
female outcome	0.880	(0.325)	0.022	(0.026)	0.019	(0.027)	0.913	2753
male outcome	0.883	(0.322)	0.023	(0.026)	-0.031	(0.027)	0.052 +	2647
joint outcome	0.628	(0.484)	0.014	(0.037)	-0.025	(0.038)	0.296	3042
				<i>Knowledge about best ways to fight fall armyworm</i>				
female outcome	0.209	(0.407)	-0.043	(0.032)	0.004	(0.033)	0.149	2753
male outcome	0.237	(0.425)	-0.036	(0.034)	-0.004	(0.035)	0.379	2647
joint outcome	0.059	(0.235)	-0.009	(0.019)	0.024	(0.019)	0.086 +	3042

First column reports sample means in control (recipient = male co-head); standard deviations are in the second column; column 3 reports average treatment effects for targeting the woman co-head only with information and column 4 reports standard error; column 5 reports average treatment effects for targeting the couple with information and column 6 reports standard error; column 7 reports p-value for the hypothesis that average treatment effects for targeting the woman co-head only with information is equal to average treatment effects for targeting the couple with information; column 8 reports number of observations used. **, * and + indicates significance at the 1, 5 and 10 percent level.

Table A.2: Decision making

	mean in ctrl	sd	target women	se	target couple	se	t-test	nobs
			<i>Decision making index</i>					
female outcome	-0.092	(0.731)	0.208 **	(0.066)	0.014	(0.068)	0.003 **	2645
male outcome	0.163	(0.883)	-0.429 **	(0.068)	-0.203 **	(0.070)	0.001 **	2645
joint outcome	-0.005	(0.783)	-0.049	(0.065)	0.061	(0.068)	0.094 +	2645
			<i>Decision about planting maize on the plot</i>					
female outcome	0.159	(0.338)	0.055 +	(0.029)	-0.027	(0.030)	0.006 **	2714
male outcome	0.328	(0.439)	-0.150 **	(0.034)	-0.084 *	(0.035)	0.053 +	2714
joint outcome	0.515	(0.472)	-0.005	(0.038)	0.060	(0.040)	0.094 +	2714
			<i>Decision about when to start planting</i>					
female outcome	0.162	(0.339)	0.060 *	(0.030)	0.009	(0.031)	0.091 +	2714
male outcome	0.349	(0.449)	-0.176 **	(0.034)	-0.071 *	(0.036)	0.003 **	2714
joint outcome	0.475	(0.469)	-0.012	(0.038)	0.008	(0.040)	0.610	2714
			<i>Decision about plant spacing and seed rate</i>					
female outcome	0.149	(0.332)	0.085 **	(0.029)	-0.008	(0.030)	0.002 **	2714
male outcome	0.383	(0.459)	-0.188 **	(0.035)	-0.081 *	(0.037)	0.003 **	2714
joint outcome	0.473	(0.473)	-0.039	(0.038)	0.056	(0.040)	0.014 *	2714
			<i>Decision about ways to fight striga</i>					
female outcome	0.114	(0.296)	0.087 **	(0.027)	0.032	(0.028)	0.045 *	2645
male outcome	0.299	(0.432)	-0.195 **	(0.032)	-0.102 **	(0.033)	0.004 **	2645
joint outcome	0.420	(0.462)	-0.024	(0.038)	0.029	(0.040)	0.166	2645
			<i>Decision timing for weeding</i>					
female outcome	0.176	(0.355)	0.083 **	(0.031)	0.018	(0.032)	0.038 *	2714
male outcome	0.347	(0.446)	-0.182 **	(0.034)	-0.075 *	(0.035)	0.002 **	2714
joint outcome	0.535	(0.468)	-0.052	(0.038)	-0.034	(0.040)	0.651	2714

First column reports sample means in control (recipient = male co-head); standard deviations are in the second column; column 3 reports average treatment effects for targeting the woman co-head only with information and column 4 reports standard error; column 5 reports average treatment effects for targeting the couple with information and column 6 reports standard error; column 7 reports p-value for the hypothesis that average treatment effects for targeting the woman co-head only with information is equal to average treatment effects for targeting the couple with information; column 8 reports number of observations used. **, * and + indicates significance at the 1, 5 and 10 percent level.

Table A.3: Adoption of recommended practices

	mean in ctrl	sd	target women	se	target couple	se	t-test	nobs
				<i>Adoption index</i>				
female outcome	-0.080	(0.489)	0.079	(0.052)	0.050	(0.054)	0.568	2478

joint outcome	0.478	(0.468)	0.002	(0.039)	-0.056	(0.039)	0.139	2713

First column reports sample means in control (messenger = male co-head); standard deviations are in the second column; column 3 reports average treatment effects for the video featuring a female role-model farmer and column 4 reports standard error; column 5 reports average treatment effects for the video featuring a couple role-model and column 6 reports standard error; column 7 reports p-value for the hypothesis that the average treatment effect for the video featuring a female role-model farmer is equal to the average treatment effect for the video featuring a couple role-model; column 8 reports number of observations used. **, * and + indicates significance at the 1, 5 and 10 percent level.
